

EASY CLEANER

EASY CLEANER

A clean product has to be stocked in clean boxes.

To regularly purge your boxes for a low price, we have developed the **EASY CLEANER** boxes cleaner.

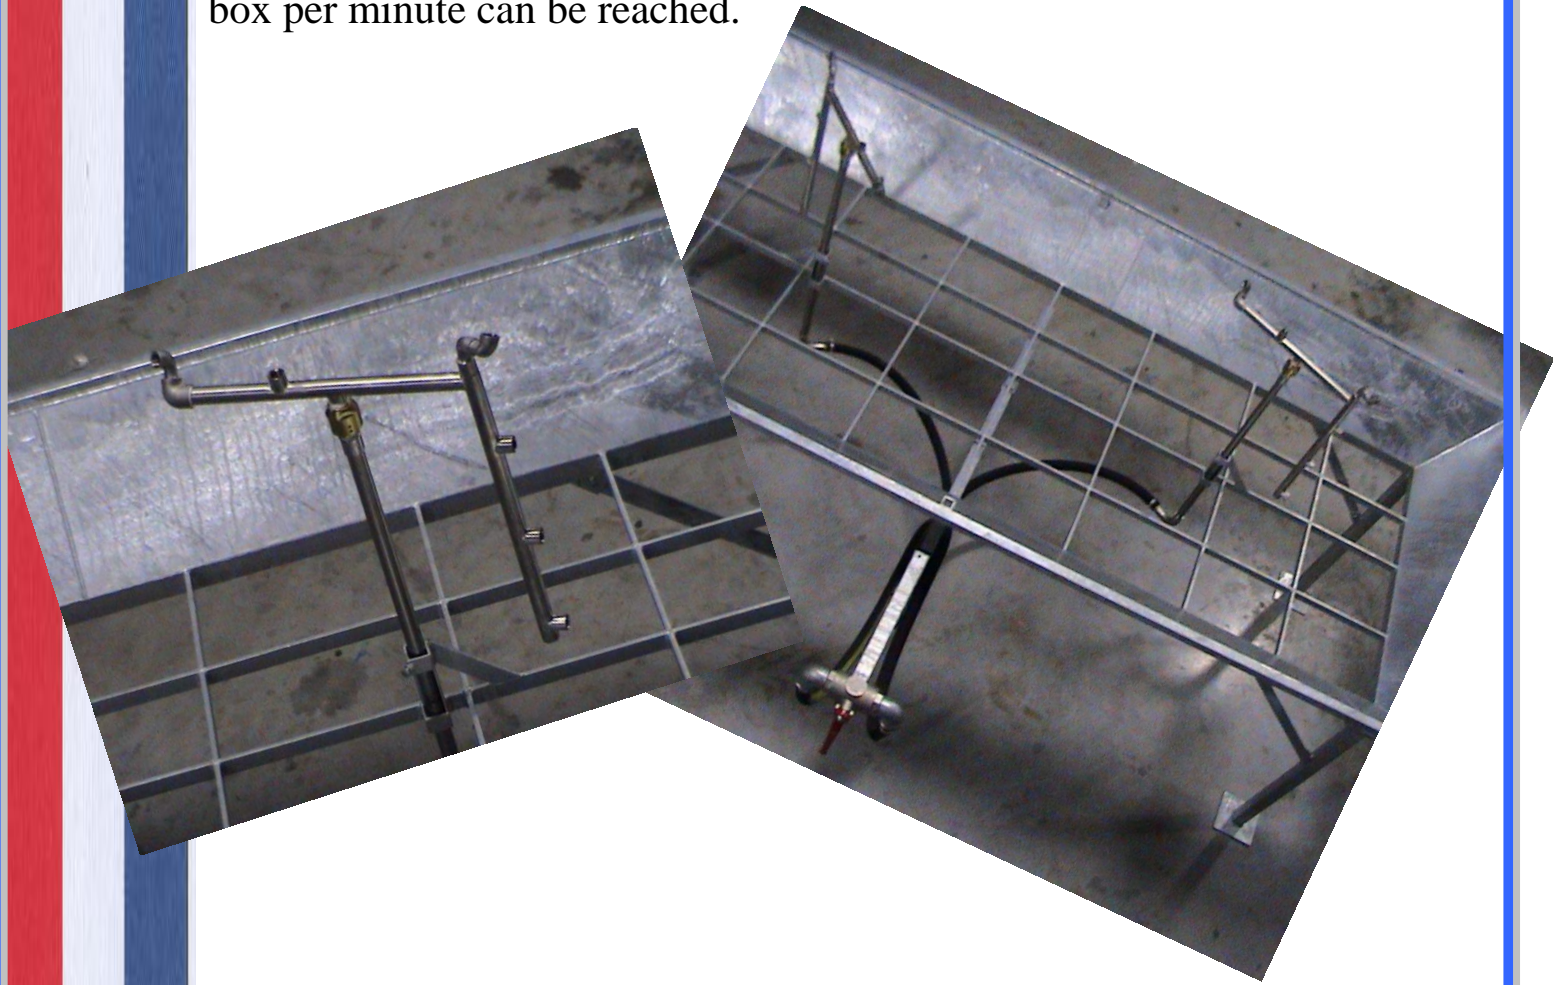

You can use the machine in combination with your own sprinkling pump, if the pump has sufficient capacity.

The rotary mechanism thoroughly purges the internal of your box by the use of special nozzle mouthpieces.

If one box is being cleaned, you can take the other already cleaned box of the machine and put the next dirty box up there again.

By this procedure, along with the **EASY CLEANER**, a capacity of one box per minute can be reached.

The **EASY CLEANER** is standard offered in a galvanized version with stainless steel pipes, but without a pump.

On inquiry:
Loose pump with electric motor
